

REMARKS

The present application is poised to issue, the issue fee having been paid August 26, 2005. Such patent issuance appears to be pending subject to the Office communication mailed September 13, 2005.

Whereas the Office communication mailed September 13, 2005 notes that a description of Figure 11 is not found in the specification, attention is invited to the PRELIMINARY AMENDMENT PRIOR TO EXAMINATION filed by Applicant September 26, 2003 wherein Figure 11 was introduced in the specification and the specification was amended to include a description of Figure 11 in the Brief Description of the Drawings.

Irrespective of the above, by the present paper, applicant has requested amendment of the specification to include the same description of Figure 11 as was presented in the aforesaid Preliminary Amendment.

In view of the above noted oversight, it is noted that the aforesaid PRELIMINARY AMENDMENT PRIOR TO EXAMINATION included several other amendments to the present application. It is presumed that such other amendments have been properly entered into the application. If not, applicant respectfully requests that such amendments be made in the application prior to the issuance of a patent.

Reconsideration of the application and progression of the application to issue of a patent are respectfully requested.

Respectfully submitted,

Paul E. Hodges
Registration No. 20,972
